## Happenings in and Around Hillcrest

Great interest is taken by local football men in the match that is to be played at Blairmore August 7th between Burnis and Blairmore. "May the best team win" is the hope of all, and we hope they will.

The coal company at Hillcrest are rapidly approaching the thousand tons a day mark. The mine is working full force and the work being done is principally all development work, but in spite of this the output is increasing day by day and it will long be long before the shipments from Hillcrest will make all the other mines along The Pass green with envy.

John Brown has taken advantage of the fine weather we are having and has gone for a few days' fishing at the North Fork. Mr. Brown is a fisherman of no mean ability, his reputation in this respect being second to none in The Pass, and a big fish will be the result of his trip. That the fish will be the result of his trip is certain, for there are no fish shops at which one can call in The Pass.

Another well known Hillcrest sportsman, William Adam, is making trip to the same locality this week. No soda water is being taken along, so Billy expects to have a fine sock's full of fish. His proposed big game hunt to take place this fall will, if as successful as he expects, tend to make Hillcrest the headquarters for bear and deer in Southern Alberta. It is proposed to go south from Hillcrest almost to the International boundary, and according to Mr. Adam the big game he is after is thick down there this year. We wish him the success he so well merits and are open to take over a head for our den if he has any to spare.

The game played at Hillcrest between the Bellevue and Hillcrest football teams drew a large crowd of spectators from the two towns. The game was a very friendly one, neither team putting up the game that was expected of them, but at the same time playing to win. Bellevue drew much less combination than they did earlier in the season, and Hillcrest were a long way behind their usual form, but this slackness was probably due to the fact that nothing depended on the game last, the pleasure of playing for a friendly rivalry. The ball ought to have been a little more lively.

Some weeks ago, a large number of people while on field upon which the game was played was not in the state it should have been for a good game. The feature of the game was the brilliant game put up by "Casey" Jones (and by some to be the original hero of Hillcrest) and this was the more marked on account of the slackness of the majority of the other players. Since the game Bellevue has made several attempts to enlist his playing powers for the team in the fight for the Mitz cup, but in spite of the tempting offers made him Casey is true to Hillcrest.

Apocryph of the discovery of a new animal in the fastnesses of the Rocky Mountains we notice the C.P.R. has obligingly placed a box car at the point nearest its route to accommodate the numerous parties of naturalists and other curious people who are taking trips in to investigate for themselves. The Gaskin is peculiar to the mountains of Southern Alberta and it is well worth while to pay a visit to the large colony of them some miles east of Hillcrest. The large pocket hole to which these strange animals fly when disturbed is a masterpiece of ingenuity, while the large shelter where they most generally congregate is attracting the attention of the master minds in the world of natural history. The beignity of the place is placed just over the entrance are a source of much controversy, while the indescribable scenes witnessed after these strange creatures have paid a prolonged visit to this place cause much merriment among visitors. Whether on account of the not unpleasant smells inside or on account of the large circular pots placed at regular intervals on the floor—resembling more than anything the polished floor of civilization—these enigmas of bush life are often seen locking forelegs one with another and indulging in the most grotesque antics when leaving. At the time of writing no satisfactory explanation of this peculiar trait has been offered, and future visitors to Gaskin may confer a great favor on science by making notes of the animal's behavior during their visit, forwarding same to the office of this paper for comparison.

Since their incorporation the Hillcrest Co-operative Society Limited have made their venture a success far and beyond their expectations. The store opened two months or so ago at Hillcrest has attracted so much business that it has been found necessary to treble the original staff in the store to cope with the ever increasing amount of trade. The stock in this Society is held almost entirely by miners and men connected with mines in the towns of Hill-

## Happenings in and Around Frank

A. I. Blais went out to Fernie on business Monday and returned to town Tuesday evening.

In the entrance examinations Janet Nicol, Alva Blais and Ernest Blais were successful in passing.

A big dance was held by the Bohemians on Monday night, and the wee-sma'-eured of Tuesday morning experienced the awakening echo.

Rev. W. T. Young occupied the pulpit of the Bellevue Methodist church on Sunday night last, the service at Knox church being in charge of Adam Lorimer, of Hillcrest.

A double wedding was performed at noon Saturday by the Rev. W. T. Young, when Francisco Marcor was united to Annetta Fabro, and Rinaldi Rinaldi to Carmen Fabro, the girls being sisters.

Rev. Fr. Sammut presented to Mr. C. Vinet a beautiful lady's purse of handmade Maltese lace nicely lined with pink silk for the best tennis player at the Sanatorium ground. The purse is estimated to cost \$12.

Harry Howes Roberts, who served four years in a London office, and the past year with Harry C. Moore, of this town, has passed successfully in his examination for solicitor. He has not yet been called to the bar, but is to be congratulated on his success.

Sam Willinsky, the murderer of George Lakatos, at Frank, went to his death through the gallows at Macleod on Friday morning last. Only the necessary officials witnessed the hanging. He was accompanied to the scaffold by two men.

The trap was sprung at 7:30 and death was pronounced instantaneous. The usual inquest was held and the remains buried in the jail cemetery at Macleod.

Great preparations have been made for the big convention to be given by the Lethbridge United Commercial Travellers' Association, at the Rocky Mountain Sanatorium, Friday, Saturday and Sunday. On Friday night a grand ball will be given together with supper and refreshments, to which some three or four hundred guests have been invited. The Macleod orchestra will furnish the music. Saturday will witness the opening of the new tennis courts and promises to be of unusual interest. A large number of invitations have been issued to tennis enthusiasts and others, and the management of this popular hospitality and holiday resort will put up \$100.00 in ladies' and gents' prizes. Sunday will be occupied in general sociality, the orchestra furnishing music throughout the day. A big dinner will be served, at which it is expected hundreds of Pass citizens as well as the visiting members of the Travellers' Association will be present.

crest, Frank, Bellevue, Lillie, Burnis and Passburg. The directors have been considering the advisability of opening up branch stores in all of these towns and without doubt in time these branches will be established, but at the present time, owing to lack of sufficient capital to firmly establish stores in all of these towns they are directing their considerations upon the opening up of branches in Bellevue and Frank, these towns having a larger number of customers and shareholders of the Society than the others. This their first venture, having proved such a success they are limited to extending the territory of their trading operations, and we venture to say that within a couple years the Hillcrest Co-operative Society will be one of the largest, best known and most profitable Societies of this kind in the West.

## Happenings in and Around Bellevue

Mrs. Andrews Goodwin is spending the week with friends in Fernie.

J. R. Bennett, ex-editor of the District Ledger, was in town on business Saturday.

Alexander McDonald, one of the old-timers of The Pass, was in town on Sunday.

Miss Lily Lewis, of Calgary, is visiting in Bellevue, the guest of Mr. and Mrs. Arnold Martell.

G. W. Goodwin was visiting friends in Fernie on Saturday last and will return this week end.

Rev. W. T. Young, of Frank, occupied the pulpit of the Methodist church on Sunday night last.

Grace V. Boerner, the impersonator and ventriloquist, gave a concert in the Socialist Hall on Thursday night of last week.

James Callan, manager of the Bellevue hotel, is leaving in the near future for Red Deer, where he is taking charge of a hotel.

Arnold Varley and Ernest Fjorv were to North Fork fishing Saturday, returning home this week with some fine specimens.

Hugh McDonald, James Fisher and James Boyle went to North Fork on Friday night, from where they hope to bring some good fish.

Quite a crowd of sports went to Hillcrest on Thursday night to see the match between Hillcrest and Bellevue. Bellevue were defeated to the tune of 3 to 1.

"Were all medicines as mercurious as Chamberlain's Colic, Cholera and Diarrhoea Remedy the world would be off and the percentage of suffering greatly decreased," writes Lindsay Scott, of Temple, Ind. For particulars, see the Socialists' hall on Saturday night.

On Saturday night a grand success. Over one hundred couples attended and pronounced the affair the most enjoyable yet held in Bellevue. Splendid music was furnished by the Fischer-Creek orchestra.

The boxing contest slated to be held on Saturday night at the Socialist hall, was witnessed by a crowded house. Two preliminaries were pulled off, the first between two Hillcrest boys, Johnson and Taylor; the second between the well known "star" Dominick Marshall and Thomas Tapella, of Bellevue. Both the prelims were very interesting and elicited considerable applause.

About 10:30 the principals of the main bout—Louis Britano, of San Francisco, Cal., and Freddie Bealle, lightweight champion of Quebec, were introduced to the audience by Sam Granger. The first seven rounds were evenly fought, with exception of the sixth, in which Bealle seemed to have very much the better of his opponent. From the eighth to the twelfth rounds Bealle did the forcing and displayed a great mastery of the pugilistic art. Great applause was forthcoming from the audience right through to the sixteenth round. Several times Britano had to cling to Bealle to save himself from the rain of blows. In the sixteenth round Britano was sent to the floor with a strong left and took the count. Bealle being announced the winner. All claim that Saturday night's exhibition, excelled anything of the kind yet staged in The Pass and it is to be hoped that a bout of a similar class will again be staged in the near future.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its functions properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your strength, open your bowels, entirely doing away with that miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by all dealers.

## III.—Advice to Buyers of Cows.

By LAURA ROSE.  
Demonstrator and Lecturer in Dairying at the Ontario Agricultural College, Guelph, Canada.

(Copyright, 1911, by A. C. McHugh & Co.)

**W**HEN buying a cow it is not always possible to find out the actual yield and quality of her milk. In such cases we must look for outward indications that are likely to bespeak good milking ability.

Some people lay little stress on form and place all the emphasis on the perform. While we agree with them, yet at the same time we believe the form of the typical dairy cow to be a result of the performance at the milk pail through many past generations. One has followed the other as surely as the fruit follows the blossom.

Development of the Cow.

By selection, breeding and management the cow with naturally good udder, paunch, diminutive udder and ability

A BARE WITHOUT LINT AND A BARE WITH LINT FOR COMPARISON.

to give milk for only a short time to nourish her young has been developed into an animal with big ribs, enormous udder and ability to give a good flow of milk almost continuously. Such is the achievement of man in the animal kingdom. What then must we look for in a profitable dairy cow—points common to all breeds?

Beginning at the nose, we like the nostrils to be large to admit plenty of air to the lungs, so as to keep the blood pure and the cow healthy. The mouth should be large and the lips firm, but elastic. A large mouth is said to indicate a large appetite. Whether this is limited to certain and does not extend to mankind I know not, but I do know we seek cows with good, keen appetites, for if they do they do the more food the more milk.

From the muzzle up to the eyes should be clean cut and not too heavy. The eyes should be large and bright. They indicate the nervous constitution of the animal, and a cow to be a good milker should have strong nerves.

"She Knew Her Business."

The forehead—the space between the horns—should be wide and clean. The forehead results from the full eye, and we want the breadth, for there is where the brain is situated. Cows show intelligence in their faces much the same as human beings do. I have fancied as I looked at a fine cow that she knew what her business was and did not neglect it. Mark you, when a cow is keeping her jaws going as in working—yes, just as much as just as effectively as a set of millstones in a great mill or a watermill at home, she is, in taking raw material and manufacturing it into a finished product. But to return to her head. The horns should be symmetrical and not too large. The ears not very large, and when they are turned back there should be seen a generous quantity of the inside. This should also be found on the udder and on the tip of the tail. I have heard that it indicates richness of milk, but more likely it denotes constitutional vigor and thrift. For the same reason we like the hairs to be soft and silky, and when we pull the skin up from the ribs it should be elastic and spring back and not be thick and leathery.

The neck should be slender and neatly joined to the shoulders. There should be no excessive amount of loose, fatty skin on the under part of the throat and neck.

The Under the Wedge.

We said a little while ago that the "wedge" means itself and all who agree with me will like to see the double wedge in the dairy form. From the head and shoulders gradually increase in width toward the hind quarters. Then from the shoulders down we like to see her broaden out.

There should be good width between the forelegs, and the space behind the

cow should be well filled out. Just in this part are situated the vital organs—the heart and lungs. A cow narrow between the forelegs is exactly the same as a narrow chested person—both are apt to be subjects for tuberculosis.

The backbone should be large, loosely jointed and a little prominent. Any other indication of nerve power, for in the backbone runs the spinal cord, the chief nerve of the body.

The barrel or body of the cow should have good length and depth. This is her storehouse and should be capable of holding large quantities of food.

The cow should be wide and strong across the loins to support the large paunch, for weakness in this point of the frame causes a sag in the back. The thighs should be thin and hollowed out to give plenty of space between the legs, and the flanks should be high, allowing room for a large udder.

Hornless say, "No foot, no horse." Dairymen say, "No udder, no cow."

The udder should extend well up at the back and well forward, being attached to the body. The sore of the udder in a cow, especially a young cow, should be level and the teats evenly placed, and convenient to the milker.

The udder should be covered with fine soft hair, should be springy, and the veins should be prominent.

The milk veins coming from the udder and running forward under the body should be large, tortuous and extending well toward the front before entering the body through what are called the milk veins. Sometimes these openings in the abdominal wall are small and press the veins, and when making them appear larger than they really are. In buying a cow not milking it is well to feel the size of the milk veins, and they will be some indication of the size and length of the milk veins.

After the cow is milked out the udder should be clean and dry, and soft and pliable. Occasionally we see a cow with a beautiful udder. After being milked she still has her beautiful udder, but has added little to the milk pail. This is known as a fleshy udder and often deceives a buyer.

The scutcheon, or milk mirror, is considered by some dairymen as an important indication of a cow's value as a milker. The scutcheon is that portion of the hind quarters at the back and top of the udder where the hair points upward instead of downward. It is taken as a good sign when the space covered with such hair is large and when there are several "cores" or "whirlpools" where the hair gathers toward a center.

Some judges like the terminal tail bone to reach the back. The tail is but a continuation of the backbone—the larger and more loosely jointed the vertebrae the longer the tail. It should taper toward the point and end in a nice, tight switch.

First Look For Constipation.

Summing up the qualities of a good cow, we should say first look for constipation. It is anything but pleasant to think of using milk which has come from a sickly, constipated animal. Don't you think with me there is a strong relationship between the vitality of the cow and the vitality of the milk she gives? First, then, let us emphasize the necessity of having a healthy cow as indicated by a readiness for her food, a full, bright eye, a clean, healthy coat, steady, even breathing and good heart and lung capacity. As suggested by the scutcheon, the large middle place and splendid udder. She should have a quiet, contented disposition, submit quietly to being handled and should be an easy milker.

A cow should increase in her milk flow during the first few lactation periods, and frequently there is a slight increase in the percentage of fat as she reaches maturity.

She may be said to be at her best from her fifth to her eighth year, and may do splendid work for many years after that age.

A cow should make from \$30 to \$60 a year profit. A very good one may

make for her owner \$75 to \$100.

The profit may be estimated if the food cost be subtracted from the value of the milk fat. The value of the milk fat, milk and manure offsets the cost of labor in connection with the care of the cow.

Rate of the Herd, But—

Receiving good care, a cow should give 6,000 pounds of milk, testing at least 3.5 per cent fat, or should make 220 pounds of butter to a year. A better should reach this amount in her second lactation period. This is not a high standard, but if put into force throughout the country it would mean that three-quarters of the cows would be doomed. The average yearly yield per cow is not over 4,000 pounds of milk. With such an average, how many poor ones there must be!

What about you? In nearly every stable there are sleek, gentle cows which stretch their necks as greedily as we for mangel-worms and which walk forth with a leisurely important air to pasture green and healthy. The pet often of the herd, and yet if X rays of the scales and the test for fat were thrown on such cows the breeder would assign them to the butcher's block.

The Lingerer Band.

Among the pet articles that ingenious persons have thought of to simplify the toilet is the Lingerer Band, a little strip of gold or silver to keep the hair in place and the hair from slipping below that of the forehead or coronet cover, where it frequently shows most unsatisfactorily. The little bands are set with colored stones or good pearls.

PERFUM OVERLOOKED OF LACE.

hold, the simple frock is transformed into a presentable frock for formal afternoon wear.

The overblown picture here is an easily copied one of cream silk net and lace, and the girlish which cooed it at the waist is of cord.

## MAKING ARTIFICIAL FLOWERS.

A Pleasant and Profitable Employment for Women.

There are so many in vogue many women will find it not only pleasant, but profitable work to make them for sale. Ribbons, daisies and morning glories are easily made and are pretty for military purposes, hair ornaments, novelties for the neck, trimming for evening dresses, etc.

The large size roses make beautiful hatpins and are made by using five squares of soft silk ribbon or mousseline silk three and a half inches in diameter. Each square is formed into a petal by first bringing together the upper right hand and the lower left hand corners, then the upper left hand and the lower right hand corners. Lastly, bring together the two lower corners and you have a complete triangle, which when gathered tightly at the bottom forms the petal.

Two of the petals are placed closely together, forming the center of the bud, and the remaining three are placed in a row around the center. Sew tightly at the bottom, then use green ribbon three-fourths of an inch wide for the lower part of the bud.

The five lower roses are made by having the outer row of petals made like loops, with the upper corners slightly folded in.

The day buds, which are made in clusters for dress trimming and other purposes, are made just as a single petal of the larger buds; but, of course, the center square is not used. Morning glories are made by using for each flower a piece of ribbon four inches long and two and a half inches wide.

First gently fold the ends, then double the ribbon so as to make both edges meet. Gather along the joined edges which form the cup, and the center square is made with several strands of yellow silk thread. No. 2 ribbon is used for the daisies. A loose knot is tied at the top of each loop, which forms the petals, and a small round button-like puff of yellow silk forms the centers.

ATTRACTIVE APRONS.

Dutch Designs Form Charming Borders on New Models.

No longer does the white apron of transparent materials, trimmed with frivolous ribbons and many lace frills reign supreme as a skirt protector at chafing daisies. For the house the Dutch apron is in possession of the field, and every girl who cannot afford one of the imported specimens made of dark blue, green, yellow or red velvet, with a pointed border in a contrasting color that is half the depth of the entire apron, does the most beautiful thing and makes her own of white material also.

The border, printed Holland linen, is about twenty-four inches wide and has the decoration along edge and alighting it three times across, thus forming a half inch frill and two half inch deep puffs against the front of the waist.

The Dutch apron has no strings, but is secured to the belt by fancy pins, preferably of Dutch silver and hand-work.

But materials other than the imported Holland linen are used, and many girls prefer the transparent tulle of dark blue chiffon or mousseline de soie with a wide printed border, while other aprons makers are applying the borders of tulle to plain colored satin or china silk.

The main thing is to have the foundation of the apron—no longer than twenty inches when finished—of a dark and dull shade and the border of a decided pattern and an entirely different color.

To Dress Up the Simple House Frock.

When you a simple house frock that has a little frill at the collar and at the cuffs, you have, by one of the gay little peplum overblown of lace, and, be-

lieve me, it is a great improvement.

The Lingerer Band.

## The Orchestra.

An entirely accurate approach to its end with many whistles and detours to it, if possible to convert the locality from observation.

Underground Workers.

Its million persons make their living under ground, working in mines and quarries. That number is about twice the population of this country when it was first settled, and it is now about 10,000,000 workers dig \$4,000,000,000 of wealth a year out of the bowels of the earth.

Verdi.

Verdi, of "Il Traviatore" fame, composed his music in his bedroom. When he was installed a beautiful piano of which he was a great master, as well as of the violin.

Easily Digested.

Carl's foot jelly, tripe and rice are the most easily digested of all foods.

Thirteen in Turkey.

Turks are so prejudiced against the "musky thirteen" that the word is usually expunged from their vocabulary.

Esparto Grass.

Esparto grass, for which no substitute has yet been found for tying fruit boxes so economically and effectively, is a spontaneous growth on the forest wastes and arid mountain lands of Murcia, Jaen, Alicante and Valencia, Spain.

The Scorpion.

The scorpion was the first known animal on the land.

British Navy Cars.

All the cars used in the British navy are made of white spruce grown in the Queen Charlotte Islands, off the coast of British Columbia.

Japan's Industries.

Nearly a million and a half families in Japan devote all or part of their time to silk culture. A million persons are exclusively engaged in fisheries, while another million and a half combine fishing with some other occupation.

Straw Hats.

A hat much used by the natives of Peru is made entirely of reeds and straw, even the lid consisting of straw matted.

A Fatal Wager.

A man named John of Paddington, England, was found dead in a van. Early in the evening he had made a bet that he would drink thirteen half pints of beer in less than ten minutes. He won the wager, drinking the beer in seven minutes.

Japanese Girls.

Japanese girls are married not only after twenty, but after thirty. Once in awhile you may meet a Miss Doi, Miss Oor or Miss Meer.

Stoutness in China.

Stoutness in China is rare, but is considered honorable in a man and beautiful in woman. The most noticeable sign of entering the Flowery Kingdom at Canton is that the stouts of the 200 disciples of Buddha are given to corpulence, and the god himself has a line like the equator.

Felt Hats.

The oldest material used for hats is the conquest, while in the "Caucasian Tales" a merchant is spoken of as wearing a "soudraish better suit."

Air Currents.

The speed of the wind increases as distance from the earth increases.

Wooden Shoes.

Dutch wooden shoes are made from willow wood. A rubber meter it costs \$6 and suffices for the making of 100 pairs of ordinary size. The wholesale price of these shoes is 12 cents. One workman is able to make twelve to fifteen pairs a day, which shows how narrow is the margin of profit.

The Imperial Canal.

China is the home of canals. The Imperial Canal there dating from the thirteenth century and having a length of over 2,000 miles.

Native Iron.

Iron ore is chiefly "boulders" and native iron is almost unknown except in the meteorites occasionally picked up in some native, but discovered by the Chinese.

Bahrain's Neapropolis.

The neapropolis of Bahrain, the center of the little kingdom of Bahrain, is the oldest piece of man's handiwork in the world.

Grass Tree of Africa.

An explorer discovered in Africa a tree which produces grease. It has large flowers and bears fruit as big as a man's head. The fruit of the tree is sufficient to yield more than two pounds of a grease which is excellent for the manufacture of candles and for greasing machinery.

Macaulay's Precocity.

When Macaulay was seven years old he had learned a compendium of universal history. A year later he wrote a book in order to convert to Christianity the natives of Malabar.

Borneo Pellets.

The Borneo pellets are mounted on stalks instead of bones. They carry a mass of seeds in a part of a territory of some 10,000 square miles.

## IN THE HOUSEHOLD.

Don't Try to Make a Woman Do a Man's Work.

Don't expect more from a servant than you could expect yourself. Increase wages in proportion as services become valuable. Remember your servant is human being, not a beast of burden. Give her some other than the kitchen as her disposal to receive company. If criticism is to be made, do it in a dignified manner. Follow the golden rule. Don't try to make a woman do a man's work. Do not interfere with any of her superlatives or dignities. Do not interfere with her love affairs unless she asks advice. Let her have a pound of white soap to use a gallon of water, and let her use the soap as she sees fit. Add to it two ounces of salicylic acid. After the carpet has been washed apply the mixture with a brush with a scrubbing brush, covering not more than a square yard at a time. Dip a coarse towel into clean water and wipe the carpet over. Do not use any soap or other clean dry cloth.

To prevent any shade of blue from being soiled for two hours in a pail of water to which an ounce of sugar of soda has been added. This is sure to try well before washing and ironing.

Washing Potatoes. For an excellent substitute for soap when the hands have become soiled by contact with blackened pots and pans.

Straight pieces of muslin are usually runed from end to end along the side, being careful to keep the seams straight as possible.

Washing the Carpet.

Avoid Trouble by Not Beginning at the Door.

To wash the carpet thoroughly you will require a bucket of warm water, a cake of carpet soap, a piece of house canvas, and if you are going to tackle a fair sized piece of carpet at once, a supply of dry cloths.

Do not begin near the door, as you will require to leave the room for fresh water, and it is unwise to walk in the carpet when damp. Make up your mind to do without the room till it is dry. Start washing as far from the door as possible and work toward it. The canvas is wetted and a portion of the carpet well rubbed. It must not be overdone, only wetted sufficiently to secure a good wash. Rubbing the carpet soap ball well. Then with the clean, wet canvas, remove the soap. Rub the canvas over the carpet, and it is quite useless when you begin another fresh piece.

No soap must be left in the carpet when the final rubbing commences. Take a dry towel and rub your feet. Though you cannot get rid of all dampness, you can almost dry the patch with friction, and this brings up the carpet to its original state.

The Quaint in Millinery.

Quaintness in the dress world is the only striking feature of the season, and among the strange concoctions of an authoritative milliner is the bonnet pictured—This charming little creation has a double brim, half of which

is a double brim, half of which

is a double brim, half of which

## Editorial Notes

Vancouver papers report a  
stringency in the money market  
and other cities are somewhat  
feeling the contagion. The  
quarantine regulations should  
be put in force at once, or the  
plague is liable to reach out to  
Alberta. Judging by reports  
from some local collectors there  
are already slight symptoms of  
the disease of stringency in this  
town, and some expert advice  
will shortly be necessary to  
cope with the financial prob-  
lem.A Blairmore gentleman, who  
recently returned from Uncle  
Sam's domain, informs us that  
while he was in Chicago and  
New York he was spotted as  
one of the northwest bluffers.  
Such is the quality of a north-  
westerner in the estimation of  
an easterner. Eastern folks will  
not take it for granted that  
conditions generally are two-  
fold better in the west than in  
the east, until they have made  
up their minds to come west  
and experience for themselves;  
but they cannot bring to mind  
any one person who has over-  
visited the west for labor or  
speculation, who is at all pos-  
sessive of energy or ability, who  
has said that western condi-  
tions are not superior. It's a  
common command in the lower  
provinces and the New England  
States to say "This west, young  
man," and the thousands who  
are taking the hint are proving  
it to be a good one.

## Erratum

The following errors occurred in  
the report of the Blairmore public  
school promotions in our issue of  
July 18th:In the promotions to D Class,  
Senior Grade L, the thirteenth  
name should have read Fred  
Nichols, the given name having  
been omitted in the former list.In the promotions from Grades  
VII (not VI), the thirteenth  
name should have read Arthur  
Ennis and Harry Vincent,  
instead of Arthur Ennis and Ralph  
Russo.

## A Beautiful Hanger

The hanger just issued by the  
Edmonton Exhibition committee  
is attracting considerable attention  
and is really worth description.  
The photograph of His Royal  
Highness, the Duke of Connaught,  
is used by special permission, this  
being the only occasion on which  
the Duke has allowed his photo-  
graph to be used for advertising  
purposes. Beside the Duke stands  
Mayor Armstrong, of Edmonton,  
Hon. R. L. Borden is easily recog-  
nized at the extreme right, and  
beside him stands Hon. Duncan  
Marshall, Minister of Agriculture  
for Alberta. This hanger is recog-  
nized as one of the most attractive  
gotten out in Canada this year,  
the coloring being good, and the  
photographic productions excel-  
lent. Copies will be furnished  
free to anyone on application to  
W. J. Stark, Manager, 625 Second  
street Edmonton.

## Body of Man Found

## Near Pincher Creek

Pincher Creek, Alta., July 30.—The  
body of a man, believed from papers  
found in the clothing to be Robert  
Ashbridge, of Kincardine, Ont., was  
discovered in the South Fork of the  
Old Man river, thirteen miles from  
here. There were also letters from  
friends in Scotland. He was likely  
drowned three weeks ago in trying to  
find the river.Happenings in and  
Around BlairmoreCharles Martin, of Winnipeg, is  
spending a few days with Mr. and  
Mrs. Frayer.Miss Rita Latta, of Cowley,  
spent several days with friends in  
Blairmore and Coleman.A. Wardman, of Lundbreck, was  
a business visitor to Blairmore on  
Saturday.Quite a number of Blairmoreites  
attended the boxing contest at  
Bellevue on Saturday.J. G. McEwan, executive mem-  
ber of the Lethbridge board of  
trade, was in town Wednesday.K. Duncan, yard master of Win-  
nipeg C.P.R., wife and daughter,  
are spending a few days with  
friends in town.Andre Luoko, of New Michel, B.  
C., was visiting his old friends in  
town on Monday last, and re-  
turned west on Tuesday.Rennie Gresham, Annie McLeod  
and Christina McLeod, being the  
only students of Blairmore school  
to write examinations, passed suc-  
cessfully.On Sunday next Rev. Fr. Sam-  
mut will say Mass in Hillcrest at  
11 a.m. Evening service will be  
held in Blairmore at 7.30.The exterior of the new addition  
to the Alberta hotel received a pri-  
mal coat of paint last week, and  
work on the interior will be rushed  
to completion.The members of Lethbridge Y.  
M.C.A. are camped near Crow's  
Nest Lake, where they are enjoying  
mountain climbing, boating, fish-  
ing, baking, etc., etc.LOST—A watch charm, the  
property of the undersigned.  
Charm is initialed and engraved.  
Finder will be rewarded by return-  
ing same to J. A. McDonald, Blair-  
more.Mr. and Mrs. Emerson Allison  
Pincher Creek, Mr. and Mrs. Ne-  
ville, of Ontario, and Mrs. J. H.  
Matheson, of Nova Scotia, visited  
Mr. and Mrs. C. H. Heston, of the  
week.The Blairmore Trading Com-  
pany have removed their dry  
goods into the western store of the  
Budd block, where they intend to  
lay in a large stock of dry goods,  
gent's furnishings, etc.Rev. Maclean Beaton occupied  
the pulpit of the Presbyterian  
church on Sunday morning and  
evening last. It is probable that  
Mr. Beaton will be chosen to suc-  
ceed Rev. A. S. Tod as pastor of  
First Presbyterian church.Mrs. Arthur Cheshire, who has  
spent many months in the old  
country, returned last week and  
enjoyed a few days with friends in  
Blairmore before proceeding to  
join her husband at Princeton,  
B.C.An unusually good attendance  
witnessed the moving pictures at  
the opera house Saturday night  
last. These pictures, which are  
well put on and of a high charac-  
ter, are proving a great source of  
entertainment and enlightenment.C. J. Northwood, of Robinson &  
Little, Winnipeg, London and  
Montreal, spent the week with Mr.  
and Mrs. R. M. Brisco. Mr. North-  
wood was formerly a travelling  
clerk of Mr. Brisco's out of Winni-  
peg.A sale of assorted hand-made  
Maltese lace will take place Sat-  
urday afternoon at the Sanatorium  
hotel. The beautiful patterns and  
the perfect workmanship will cer-  
tainly attract many of our ladies,  
who are so much tempted by fine  
lace.The C.P.R. have a gang of men  
at work erecting concrete breast-  
work and bridge abutments at the  
railway crossing over Lyon Creek.  
These improvements were badly  
needed, and will avoid any wash-  
outs occurring there in the future.The ball given at the opera house  
Wednesday night by the electrical  
workers of the Alberta Govern-ment Telephones, was a great suc-  
cess. About two hundred lovers of  
the art of terpsichore made their  
appearance on the floor and all  
report a most enjoyable affair.E. T. Fitzsimmons, manager of  
the Davenport Coal Company at  
Burns, was in town on Wednes-  
day.J. H. Lee and P. Patterson have  
opened a real estate and insurance  
office on Victoria Street between  
Eighth and Ninth Avenues. See  
their ad. in another column of this  
paper.The Altar Society ladies of the  
Catholic church of Blairmore cor-  
dially invite their many friends  
at the Sanatorium Hotel on Sat-  
urday afternoon. Refreshments will  
be served for the benefit of their  
church at the inauguration of the  
new tennis ground.W. J. Budd, vice-president; John  
George and D. Sultor, directors of  
the Keystone Cement Company,  
were in town Wednesday on busi-  
ness in connection with the pro-  
posed works in Blairmore. They  
left on the night train for Leth-  
bridge and Calgary.A large attendance greeted  
"Uncle Tom's Cabin" on Wednes-  
day night, and were well pleased  
with the performance. In the  
forenoon the company held a free  
street parade and the procession of  
ponies, mules and human monkeys  
attracted considerable interest.A young man employed with the  
Uncle Tom's Cabin Co., was  
arrested by the police on Wednes-  
day, acting on advice from Pincher  
Creek. He was taken to Pincher  
Creek to answer to the charge of  
stealing several articles from par-  
ties there, which articles were found  
in his possession.R. B. Mackay and H. P. Robin-  
son, of the Canadian Bank of Com-  
merce, Macleod; George Dodds,  
owner of Bank, British North  
America, Macleod; and R. D. Bar-  
lett, of the Pioneer Furniture Co.,  
Macleod, paid Blairmore a visit on  
Sunday last and enjoyed a cruise to  
the top of Goat Mountain to-  
gether with Messrs. Denison, Ir-  
win, Crane, Drummond and Bar-  
lett.A. A. Sparks, proprietor of the  
Cosmopolitan hotel, has decided to  
put in a solid concrete sidewalk,  
15 feet wide, in front of the new  
hotel and eight feet wide fronting  
on Sixth avenue. This will be  
a great improvement and no  
doubt others will take lik-  
ing to the advanced step and  
before very long the business  
thoroughfare will be bounded  
by a good stretch of solid concrete.A couple of anglers from Cole-  
man were brought before Justice  
Gresham on Monday morning on  
the charge of catching and having  
in their possession fish that meas-  
ured considerably under nine  
inches in length. The fish were  
produced as evidence by the R.N.  
W.M.P., some of which were not  
more than 3 or 4 inches in length.  
The culprits were allowed to rein-  
burse the treasury funds to the  
tune of about \$40.A. McLeod returned Monday  
morning from an extended trip  
through the great hubs of the  
States, whither he had been trav-  
elling on business in connection  
with the Blairmore brewery. Mr.  
McLeod also visited his brother  
Frank at Moose Creek, Ontario,  
where several days were spent. He  
reports extreme heat throughout  
Illinois and New York States, and  
it was a pleasure to get back to  
the tropical clime of The Crows' Nest Pass.A. A. Sparks was on Monday  
nominated councillor to succeed J.  
G. Smith, retired. The appoint-  
ment of Mr. Sparks to the alder-  
manship of Blairmore meets the  
approval of every fair minded citi-  
zen. Mr. Sparks is one of the  
proudest residents of the town and  
during his long stay here has  
proved to be an honorable and  
capable citizen who will prove  
possessory of all the qualifications  
necessary for the conducting of  
municipal affairs with fairness to  
the town and its inhabitants.

it. For sale by all dealers.

## NAPRO-CO LAXATIVES

Are best for the children as well as the grown-up. A box at your drugist's.

### Cutting Trees by Wire

A new method of felling trees by the friction of a steel wire, which is able to work its way through a 24-inch tree in about six minutes, is putting the axman out of business in the forests of Germany.

The wire is drawn rapidly about the tree and the heat generated by the friction is sufficient to burn a thin carbonized kerf, which is both smoother and cleaner than the cut of the charcoal saw. The wire adhering to the trunk is extremely thin and allows the structure and any disease of the wood to be distinctly recognized. It enables the tree to be marked with chalk, and at the same time serves to preserve any trunks that may be left temporarily in the woods. There are many advantages in this method, notably in waste, decreased labor, absence of all apparatus usually required, and the machine can be used in close quarters not sufficient for men chopping.

If the new German plan should become general and the trees be cut close to the ground, it would mean the saving of a great amount of lumber that is now wasted.—Portland Express.

A mad dog bit my landlady. How do you know he was mad? Didn't I say he bit my landlady?—Satire.

## A SLUGGISH TORPID LIVER

LEAVES BILE AND OTHER POISONOUS IMPURITIES IN THE BLOOD

The Whole System is Cleaned and Invigorated by

## DR. CHASE'S KIDNEY-LIVER PILLS

Let the liver get sluggish and torpid and there is trouble with all the organs.

The tongue is coated, the head aches, digestion fails. There is fullness, fermentation, flatulency in the stomach, and turns. The kidneys become clogged and inactive. Even the bowels refuse to move, and the system by pimples, blotches and liver spots.

The action of the liver must be awakened, and nothing can accomplish this so quickly and so certainly as Dr. Chase's Kidney-Liver Pills. It is through the liver and kidneys alone that the blood can be freed of all its impurities and the morbid matter which collects there when the liver is torpid.

Many a suffering man and many a delicate woman have been cured of liver complaint and kidney derangements by Dr. Chase's Kidney-Liver Pills. By their direct action combined action on both liver and kidneys they have often proved successful where other kidney medicines have failed. Backache, Kidney Disease, Liver Complaint, Chronic Indigestion, and Constipation are thoroughly cured by Dr. Chase's Kidney-Liver Pills. One pill a dose, 25c a box, at all dealers, or Edmondson, Bates & Co., Limited, Toronto.

The Young Wife's Complaint

I wish to complain, said the bride haughtily, about that flour you sold me. It was tough.

Tough, ma'am? asked the grocer. Yes, tough. I made a pie with it and my husband could hardly cut it.

British imports of hops, about half of which came from the United States, reached \$1,335,000 worth last year, against \$1,335,000 in 1910 and \$95,325,000 in 1909.

Mormon missionary work in Japan was commenced in 1900 and the sect now has its churches in Tokio, Nagasaki, Kobe, and Osaka, says the Gospel News of Tokio. There are fifty missionaries with a total of fifty-five believers, and the members of the church in Tokio number fifteen recruited from among survivors, women, the Government service, teachers and students of middle schools, commercial clerks, telephone girls, etc.

Why did you fire that bellboy from the National Guard? Every time the Captain asked "Front" he jumped from the ranks and held out his hand for a key.

23 THE P...

W. H. N. 902

### STARTLING PREDICTION

Sir William Ramsay Thinks Coal Miners May Soon Be Unnecessary

Sir William Ramsay, the eminent scientist, in a speech at the opening of the International Chemical Congress at the Agricultural Hall, made the startling prediction that he might be able to do the work of the coal miner.

Explaining how, he pointed out that salt water by introducing water down the shafts of the salt mines, the water being pumped back in the shape of brine and the salt recovered by evaporation. He had carefully considered the coal industry from this standpoint, and had seriously come to the conclusion that no coal need be burnt for ordinary purposes. The salt water of things would be to have the salt in the form of the earth. What was to hinder the coal being left where it was he asked.

The gas might be obtained by putting down the boring, the necessary air to produce partial combustion in this way. A certain amount of a mixture of carbonic oxide and hydrogen, could be produced. This would rise to the surface and be used as fuel, could then be employed for any purpose for which coal gas is used. Sir William Ramsay added that electric light might be distributed, and that it might be used for heating. At present it was expensive but there was no reason why in future it should not cost one-half a penny or a penny per unit.

Later, one of the guests of the Institute of Printers and Kindred Trades at the dinner, Sir William made the highly interesting statement that he had been in communication with the owner of a proprietor, who had decided to give him an opportunity of making the experiment. He had suggested, the experiment would be made, but if it proved successful, it would be a large enough plant, a candle which, in the words of Bishop Ridley, would not be put out in our time.

It Has Many Qualities. The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many of the ailments of the human body. It will cure a cold, prevent sore throat, it will relieve the swelling from a sprain, cure the most persistent cases of rheumatism, it will heal cuts and contusions. It is a medicine chest in itself, and can be kept in a quarter of a dollar.

### Slamme Elephants

Slam is a peculiar kind of animal and not a few of those which pass and re-pass in the course of the day's work. Keep the new arrival waiting to hear a steam calliope, the countrywide that a circus is in town. There goes the sacred Indian buffalo! But this time he and his brother are only going under the charge of two small boys, down into the arena. The elephant is a beast of great strength, and he is a man's co-laborer, not his beast of burden. Lucky is that elephant which is born an albino, for he will be all his days a sacred white elephant, scrubbed and fattened and pampered, and he will never be used for any other purpose. The baby that is a little lighter grey than his relatives may attain to great wealth, but the baby elephants that are only light grey or white, not a true albino, will be shipped off to the circus, and the circus will be taken without a plentiful supply of game, for the elephant, small, quick and powerful, may be had for the table at the expense of a little patience and a good stock of Christian Herald.

Flodder is looking pale. He's just killing himself with hard work. What's he engaged at? Inventing a labor-saving machine.—Juck.

### WELL POSTED

A California Doctor With 40 Years Experience

"To my 40 years' experience as a trader and practitioner along hygienic lines," says a Los Angeles physician, "I have never found a food so complete as Grape-Nuts for the benefit of the general health of all classes of people."

"I have recommended Grape-Nuts to a number of years to patients with the greatest success and in every year of practice makes me more enthusiastic regarding its use."

"I have a rule to always recommend Grape-Nuts and Postum in place of coffee, when giving my patients instruction as to what to eat. I know both Grape-Nuts and Postum can be digested by anyone."

"As for myself, when engaged in much mental work my diet twice a day consists of Grape-Nuts and rich cream. I find it just what I need to build up any matter and keep the brain in good working order."

"In addition to the beneficial effects as a brain and nerve food Grape-Nuts always keeps the digestive organs perfectly healthy. I carry it with me when I travel, otherwise I am almost certain to have trouble with my stomach." Name given by mail by Canadian Postum Co., Windsor, Ont.

Strong endorsements like the above from physicians all over the country have stamped Grape-Nuts as the most scientific food in the world. "There's a reason."

Look in place for the famous little book, "The Road to Wellville."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

### HEALTH IN THE FARM HOME

Written Expressly for Dry-Farming by Miss Sarah P. Jeweller, D.O., Lethbridge, Alberta.

The old adage "an ounce of prevention is worth a pound of cure" is verified on the subject of health. Two of the most indispensable means to be used toward this end are fresh air and proper digestion.

Residents of the country sometimes get the idea that because their work frequently takes them out doors for a moment at a time, they do not require to attend to the ventilation of the house, but this is not the case.

Never neglect to get a good circulation of fresh air through the rooms you live in three or four times a day, and by all means have the sleeping rooms well ventilated—down wide open in the summer and always put away in cold weather. These individuals who are afraid of fresh air in their sleeping rooms deprive themselves of the very first principle of health. Have fresh air, but avoid draughts. If you have two windows, have both open; if but one window, open it and leave the door ajar, being careful to place the bed where there will be no draught. But should you be so situated that you cannot leave the door open, then open the window from both top and bottom, thus assuring a better circulation of air. A hundred times rather spend a little more on fuel if necessary than neglect the ventilation of your house.

You should consider it a misdemeanor for any of your family to sleep in it, it is too small and dirty. If your house has a veranda, make a living room out of it for the summer. If it is veranda, put down a wooden floor or a few old rugs on the ground at a convenient and shady place outside the house and practically live there. You can do your sewing, mending, washing, preparing of vegetables, and even washing of clothes there. It may require a few more steps to carry things out, but it will also save much of clearing up in the house, and the improved mental health will repay you 20-fold.

But in this outdoor living room you must have a screen fitted over a frame which will rest on a table or other flat surface, under which you can plant any vegetables, fruits, or flowers that you may wish to have for a time, to prevent flies from lighting on them. Shut the fly screen when your worst enemy, as it is a disease carrier. I wish to mention here that in the strictest economy, you get screens for your doors and windows, so you will be able to keep them free from flies.

Never allow water to be poured near the outdoor living room, or any refuse to be thrown around, as these things may become productive of disease. Always keep the house clean. What is even much better than open windows for the sleeping room is to place the veranda with a screen and move your bed out there; or put a door on a dry part of your lawn and have the bedstead sent so it can be opened for ventilation. You will have people say that they know of those who sleep in closed rooms and are perfectly well. This may possibly be true of individuals with strong constitutions, but for one of us we could point to scores who are all weak and who could recover their health by the fresh air treatment.

Another factor in the cause of disease is a small number of cases is rapid eating. Digestive troubles of this kind are very prevalent in this age. Rush is one of the sins against nature on this American continent. It is not alone found in business, but 75 per cent of the people carry it to the table. They do not take time to properly masticate the food they eat. They come to the table tired, eat their food hurriedly without masticating it as they should, and the result is sooner or later indigestion, followed by various other maladies. The food taken is often blamed when it is due to the way it is eaten and not to the food itself.

It is infinitely more difficult to regain health after it has become undermined than it would be to maintain a state of health by obeying the laws of health.

Your stomach will take considerable abuse without protest; in fact it is before it rebels and its owner becomes aware of the trouble he or she has brought upon himself or herself.

In eating too hurriedly you are apt to overeat, inasmuch as the hunger is not appeased as it should be. The food eaten is properly masticated, in which case it is more easily and more perfectly digested, thus furnishing more nourishment for the body.

The Old Clock of St. Giles

All local Romanians will learn with regret that the well known clock on St. Giles' Tower in Edinburgh, which must have told the time in Scotland for many years, has disappeared. Apparently a workman fell through the clock and damaged the mechanism so badly that the civic authorities do not consider the worn out works worth repairing. For this clock will be replaced by an invisible timepiece, which will be a fine piece of work.

The clock of St. Giles has a mere sixty years compared with some of the medieval horloges on English cathedrals. There are clocks that date from the fourteenth century at Exeter, Wells and Peterborough.

Stubbish

Wife—My husband is not well. He's afraid he'll give up.

Wife's Mother—Well, he may give up. He certainly never gives up. —Topsy.

## COMES FROM NOVA SCOTIA THIS TIME

ANOTHER SPLENDID CURE BY DODD'S KIDNEY PILLS

R. Moulaison, whom two Doctors treated, finds relief and permanent cure in Dodd's Kidney Pills.

Quarrels Island, Yarmouth Co., N.S. (Specialist).—I, R. Moulaison, 22, well known resident here, is telling all neighbors of his cure from a severe attack of Kidney Disease which kept him in a state of pain and anguish for two months and defied the efforts of two doctors who were treating him.

"My trouble started with a cold," Mr. Moulaison says. "My muscles would cramp and I had backache and sleepless nights. My head ached, and I was tired, nervous feeling while specks of light flashed in front of my eyes."

"I suffered in this way for over two months and was treated by two doctors, but they didn't seem to be able to do much for me. Then I started to take Dodd's Kidney Pills and they helped me almost at once. Six boxes cured me."

Dodd's Kidney Pills always cure the kidneys. Cure Kidneys strain all the impurities out of the blood. That makes pure blood and good health.

Mrs. A.—Are you troubled much in your neighborhood with borrowing.

Mr. B. (Indecently)—Yes, a good deal. My neighbors don't seem to have anything I want.

Dearest, if I were far, away, could you love me still?

Why, Reggie, what a question! I'd rather be further away from you, better I should love you.

The new clock came out and did very much for the clock. It was a very fine clock. After dinner, she approached the head of the house.

How early must I get up in the morning? she inquired.

Well, said Mr. Stubbish, the first thing you do is to get up at 6:25. You'll have to get up about 6 if you want to make that—Washington Herald.

An Always Ready Pill.—To those of regular habit medicine of little concern, but the great majority of men are not of regular habit. The worst and most dangerous of all diseases is that of the irregularity of life. Men are not of regular habit. The worst and most dangerous of all diseases is that of the irregularity of life.

Post—Do you think the day will come when there will be no coal left on earth?

Farther—Well, it won't be our cook's fault if it doesn't.—Life.

Minard's Liniment used by Physicians

You mean to say a hundred aloe the marble clock with the mantle with the fog in the room? Yes, but you see Pido is only a watchdog the little deer.—Life.

London reports that the fashion of this extraordinary variety of head covering was known in Florence toward the end of the eighteenth century, but its growth in popularity did not begin until 1838, when its manufacture was begun in France.

The Chinese believe that evil spirits are able to move only in straight lines, and that they cannot penetrate through solid matter; therefore the problem of keeping them out of a dwelling or a garden seems to them a simple matter.—Chicago News.

### The Sultan's Palace

The Moorish palace of Sultan Abu Yakub Yusuf at Seville—known to-day as the "Alcazar"—was one of the most elaborate practical jokes extant. When it was a gay mood some important merchant or notable of Seville would receive a pressing invitation summoning him to the presence, in a fever of delighted expectancy the flattered guest would do his wildest raiment and his kin to the palace. There he would be ceremoniously conducted to the gardens and directed up the long avenue.

Half way up it he would inevitably tread upon a moving staircase resting upon a spring, and immediately the jest of water would gush out of the ground and from the surrounding shrubbery and drizzle him. Amid the jeers of the courtiers the luckless and bedraggled wight would beat an undignified retreat. Before he was allowed to leave the palace, however, he was sworn to secrecy on pain of death. At all costs nothing must make the joke fall flat when repeated.

The treacherous fountains have been removed and to-day the visitor may pass with impunity, but a peasant to the head gardener will usually cause the fountains to play.—The Argonaut.

Force of Habit

He had a motor-car, but he also wanted a motorboat, and so he bought one. He had a days' tuition at one of those places where they guarantee to teach you anything in twenty-four hours, and then went on a trial trip alone.

It was late when he returned home. He was in by the time his wife's clothes were wet and his hair hanging over his ears in strings.

John exclaimed his wife. What up earth.

It's all right, Mary, he assured her. No, I didn't upset. Everything's all right. But when I had been out on the water a couple of hours the motor went wrong and—

Well, before I—er—realized it I was over the side and trying to get under the counterbalanced thing to fix it.

He Knew

It isn't the size of the gift but the spirit that goes with it that counts, she said softly.

Who is going to get a twenty-five cent present from us now? asked her husband promptly.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying the best worm-remover.

What part of the family tree is it, Miss?

Mothers—I guess you are one of the likes.—Do you suppose that's what meant this morning when he said that I ought to be trimmed about every six weeks?—Judge.

### International Poultry Food

Prevents Cholera and Saves the Little Chicks

A little chick is just a little baby—its health depends on its food. Improper feeding after using a daily dose of "International" can be prevented. It will cure cholera and International Poultry Food.

My children had Cholera and some of their friends were taking cholera. After using a daily dose of "International," I kept them well—within an hour, and Cholera has left me gone.—J. F. BARNES.

Give all your children a daily dose of "International." It keeps them well—within an hour, and Cholera has left me gone.—J. F. BARNES.

## Board of Trade Special Meeting

Blairmore Brewery Company Want  
To Be Insured Against Damage  
Cement Plant May Incur

A special meeting of the Blairmore Board of Trade was held in the council chamber at 9.30 on Wednesday night to consider some differences outstanding between the Keystone Cement Company and the Blairmore Brewing and Malting Company.

The Brewery Company wanted to hold the Cement Company liable for any damage that might occur to them through being menaced by dust from the proposed works. They stated that it was necessary in connection with the beer and malt manufacture to have vats and tanks so situated that they might be given any quantity of air, and that if such ventilation were installed it would be difficult to prevent dust getting into the vats or tanks. No expert advice could be obtained at this meeting, but the majority of those present were of opinion that judging by the distance the works would be from the brewery there was little chance of their proving a menace.

The Board was informed that three of the directors of the Keystone Cement Company were in town today trying to adjust matters with the Brewery Company. They claim to have several desirable locations in view, amongst them being Bow Island, where the presence of natural gas and other resources were sufficient to counterbalance the inducements offered them at Blairmore, and that the company were not altogether dependent upon Blairmore as a site for their proposed works.

It was therefore up to the people of Blairmore to endeavor and do all possible to secure the industry for this town, which was something that would mean an everlasting backbone to the laboring resources and which no town with such opportunities right at hand as has the town of Blairmore could afford to let slip by.

The plant that the Keystone Cement Company propose to erect would be one of the finest manufacturing in the whole Dominion. The very latest type of electrical machinery would be installed, and the utilization of all dust in the manufacture of marketable materials would be prominent features.

After considerable discussion on the matter the secretary was authorized to forward the following lettergram to John George, director Keystone Cement Co., Lethbridge, and a copy of same to be posted to the head office of the company at Calgary:

"That the Brewery officials can do nothing without consulting shareholders. This will delay matters about two weeks. Board of Trade suggests that you send particulars regarding capacity and scheme for disposal of dust in writing; also a statement of conditions under which you are prepared to

## Wesley Church Sunday School Picnic Was a Grand Success

The Wesley church Sunday school picnic from Lethbridge to the Crow's Nest Lake on Thursday last was a thorough success and in fact the finest event of its kind yet held in Southern Alberta. Two trains started out from Lethbridge with some 800 people, who were added to by several hundreds from all along the line to Coleman. Passing through Blairmore the fifteen cars were packed to their fullest and in several cases some were crowded to the car roofs. The day was gloriously fine and conditions generally were all that could be expected after such a continuous rainfall as had been experienced in the mountains for some weeks past. Scores from all the towns in this locality attended the affair, and all report a most enjoyable time.

## At The Sanatorium

The following guests registered at the Rocky Mountain Sanatorium during the week:

Sunday—Mr. and Mrs. A. M. Denmore, of Lundbreck; F. W. Inasler, of Calgary.

Monday—N. A. Campbell, R. H. Groom and wife, Miss Myrtle Price and F. L. Baker, of Calgary; F. H. Scott, S. A. Fraser and E. Montgomery, of Pincher Creek; M. Neiland, of Macleod; C. H. S. Keith and A. Cornie, of Fernie, B. C.; John McKeegan, of Coleman.

Tuesday—Mr. and Mrs. Coombs, of Taler; Wm. M. Campbell and son Myrie, of Macleod; L. Roseweller, of Tacoma, Wash.; O. J. Jennings and A. G. Smith, of Calgary; A. H. McKeown, S. D. Peacock and Francis Aspinall, of Lethbridge.

Wednesday—D. Snider, of Calgary; John George, of Paulson, Sask.; W. J. Budd, of Calgary; W. M. Campbell, of Macleod.

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gebhardt, Oriole, Pa. There is nothing better. For sale by all dealers.

WANTED—A smart, industrious and intelligent boy of 15 or 16 years of age, proficient at spelling, to learn the printing business. Good opportunity for right person. Apply to the office of the Blairmore Enterprise.

## Executives Hold A Joint Meeting

Need of Branch of The Lands Titles  
Department in Southern Alberta  
Is Being Strongly Agitated

On Wednesday night a joint meeting of the executives of the Coleman and Blairmore Boards of Trade was held in the council chamber at Coleman. Those present were H. G. Good-ey, president; Alex. Cameron, W. L. Ouimette, E. Disney, O. E. S. Whiteside and Percy Wilimott, of the Coleman board; and D. A. Sinclair, president; W. A. Beebe, L. Dutil, T. B. George and W. J. Bartlett, of the Blairmore board, as well as W. F. Stanley, editor of the Coleman Bulletin.

The object of the meeting was to receive certain proposals being put forward by the Lethbridge Board of Trade through their representative, Mr. J. G. McEwan. A letter was presented to the boards and read by Mr. Ouimette, asking the co-operation of the different boards of trade towards decentralizing of the land titles office and urging the establishment of a branch in some central part of Southern Alberta.

Mr. McEwan explained very fully the object in view and the great inconvenience experienced at the present time through having to wait upon the over-crowded branches of Calgary or Edmonton, and the dire need of a branch in central southern Alberta to help facilitate the work of the land titles department. He stated that every judicial centre should possess a branch of the land titles department. The north had its centre in Edmonton, the mid-province in Calgary, and now it was necessary that the south should choose her central point. Mr. McEwan thought that taking all conditions into consideration Lethbridge was the most suitable location; but it was not required of any board that they specify any one point for the proposed centre. All was necessary was to place themselves on record as realizing the urgent need of a branch of this department somewhere in Southern Alberta.

Mr. Ouimette asked if the associated boards of trade had taken any steps in the matter, and was informed that they had not, as far as the Lethbridge board were aware at the present time. The different boards were required to take the matter up individually and pass resolutions to forward the government agitating for the decentralization of the lands titles office and establishment of a branch in the south.

As the meeting had been called on very short notice it was decided to defer the matter until the regular monthly meeting on Monday, August 5th, when in all probability a resolution will be passed by the Board.

The members of the Blairmore board assured the Coleman board that the subject would be discussed at their regular monthly meeting to be held on Tuesday night, August 6th. The meeting adjourned at 8.45 p.m.
